

# Sani-Flex™ Unitized Sanitary Gaskets

Sani-Flex sanitary gaskets are the latest development in unitized sanitary gasket design. Sani-Flex gaskets consist of a PTFE sealing surface chemically bonded to a white EPDM rubber inner core. This unique design concept provides for an all white, extremely pure, flexible unitized gasket that incorporates the chemical resistance of PTFE and the flexibility and sealing force of rubber.

This advanced design gasket meets and exceeds the stringent requirements for purity in pharmaceutical, biotechnology, and food and beverage processing.

Sani-Flex gaskets are FDA and USP Class VI compliant.

- Highest Purity
- Unsurpassed Chemical Resistance
- Excellent Flexibility
- Do not impart of taste or odor
- No cross-over contamination
- Change-out requirements greatly reduced
- No Extractables

*Statements and recommendations in this publication are based on our experience and knowledge of typical applications of this product and shall not constitute a guarantee of performance nor modify or alter our standard warranty for this product.*

*Prior to actual use it is highly recommended that suitable tests be run to determine this product's suitability in a specific application. This is critical where failure could result in injury or damage.*
